Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Examiner's Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Referring to claims 3, 4, 6, 8, 10, 12, 14, 16, 18, 20, 22, 24, 26-29, 31, 35, 36, 40, and 41, the prior art searched and of record neither anticipates nor suggests in the claimed combinations, adding values according to the occurred error to the values of the unscanned pixels along the detected direction of the profile as an exceptional process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claim Objections

Claims 9, 13, 17, 21, and 25 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim 9, which depends from claim 4, is a duplicate of claim 8, which also depends from claim 4. Claims 13, 17, 21, and 25 depend directly or indirectly from

Art Unit: 2626

claim 9 and are duplicates of claims 12, 16, 21, and 24, respectively, which depend directly or indirectly from claim 8 in the same way.

Applicant should either cancel or amend claims 9, 13, 17, 21, and 25. For example, this branch of claims could be replaced with a duplicate branch ultimately depending from any one or all of claims 26-29 or from a new dependent claim supported by the original specification and depending from allowed claim 3.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Sommer (US 6026199 A) discloses that the selection of pixels to which the quantization error E is distributed will be determined by the direction of the edge transition.

Chan (US 5140432 A) disclose diffusing the error remainder R in the direction of a changing gray scale profile developing in the image being scanned.

Katayama et al (US 4,878,125) proposes a method of varying the ratio of dispersion of error into the surrounding pixels according to the amount and direction of edge present in the image.
